# WORKING EXPERIENCE

HIC Global Solutions

(Dec 2016 to Sept 2018)

SaaSFocus

(November 2018 to Present)

***Certified Salesforce Developer***

## PROJECT DETAILS

### **Purus Consultants UK -**

**Environment :** Workflow used, apex classes, Triggers, Visualforce page, layouts, HTML, Javascript, test classes, record types, Pagelayouts, Object creation, Custom fields, Custom Buttons.

#### **Description :**

The project is to about creating the attachment reports for each records creation for account and opportunity records and created the inline page which show the attachments for record and show the who viewed when created and who downloaded the attachments.

### **Numeric (Service Cloud) -**

**Environment :** Field Service Lightning, FSL Objects, Dispatcher, Custom Object,

#### **Description :**

This project is use to provide the Field Service facility to Numeric client which provide installation and support to UPS and batteries installation and the installation service to the customers and track the inventories using the FSL Salesforce platform. We have setup the FSL object, dispatcher and custom objects and provide the services on both desktop and FSL mobile app to service engineer agent and customers.

### **Coacto Geo Slam -**

**Environment :** Lightning apps, Kanban, Lightning Events, Lightning tab, Lightning components, javascript, apex controller, visualforce Pages, test classes, wrapper classes.

#### **Description :**

1. Customise Kanban view for Opportunity objects, displaying records based on record types and stagename and show the number of records for each record type and stagename and show the total amount of field values according to different record types. Added the drag and drop functionality and date filter in Kanban view in lightning experience.
2. Component list views of Case objects and dynamically show the records based on different list views.
3. Created the component to show list of existing groups and users and show records based on selected groups and users and create the records based on that selection.

## **Thermax Limited -**

### **Environment :**

Worked on validation rule, process builder, workflow rule, Assignment Rule , Apex class ,Test classes and all sales process followed in this project.

### **Description :**

Thermax's system, products and service help industry achieve better resource productivity, and improve bottom lines while maintaining a clean environment. It's portfolio includes products for heating, cooling, water management, and specialty chemicals.

## **Bigquery to Salesforce Integration (Lightning) -**

**Environment :** Lightning controller, Lightning component, App, Helper class, custom Object, SOQL, visualforce pages,Named credentials, Rest Api class, Callout test classes.

### **Description :**

This project is use to integrate the google bigquery to salesforce in which we have created the visualforce page and showing list of fields from biquery datatable and upon the selection of fields and we are dynamically creating query which will pass through the callout method and fetch the data from the dataset table and displaying data in visualforce page. On the basic of email we are inserting or updating the list of contact in salesforce.
